EMB R8 marks World Ozone Day celebration through a youth forum on ozone layer protection, climate change action

In celebration of World Ozone Day, the Environmental Management Bureau (EMB) Region 8 together with the Eastern Visayas State University (EVSU) Natural Sciences Department gathered environmental science students from different year levels for a lecture-forum highlighting ozone preservation and youth in climate action on September 16, 2022, at the EVSU Main Campus, Tacloban City.

The forum, titled "Youth in Action: Key to Ozone Preservation," also provided the teachers and students an opportunity to learn more about the program on sustainable and eco-friendly schools, as well as to broaden their values in environmental management and conservation.

World Ozone Day, also known as the International Day for the Preservation of the Ozone Layer, is celebrated annually on September 16 to honor the signing of the Montreal Protocol, which aims to protect the ozone layer by banning the production of various chemicals that are responsible for its thinning.
