### EMB R8 disseminates IEC materials to various stakeholders

In an effort to strengthen environmental awareness, the Environmental Management Bureau Region 8 distributes information, education, and communication (IEC) materials to various schools and organizations in Leyte. The provided IEC materials are posters on waste electrical and electronic equipment (WEEE), World Environmental Health Day, and tips for ozone layer preservation.

Among the recipient schools are the Fisherman's Village Elementary School, Dr. A.P. Bañez Memorial Elementary School, Sagkahan National High School, Eastern Visayas State University – Tacloban Main Campus, Cabacungan National High School, San Jose Central School, Dulag National High School, San Rafael Elementary School, Dulag Central School, Bato National High School, Bato Central School, Burauen Comprehensive National High School, Caraycaray Elementary School, and Naval School of Fisheries. EMB R8 also disseminated the IEC posters to the UP-ENVISAGE and UP-HALCYON, two of the partner academe organizations.

The "What are WEEE? Waste Electrical and Electronic Equipment" poster provides information on the fundamentals of WEEE and its proper disposal. WEEE are common household waste where one may be oblivious to its effects and how to dispose of it properly. The poster aims to guide the reader through its categorization, proper disposal, and harmful effects.

The World Environmental Health Day poster entails the alignment of the National Environmental Health Action Plan with the 17 Sustainable Development Goals. In addition, the

"Get in the Zone, It's Time to Save the Ozone" poster encourages the protection and preservation of the Ozone Layer through simple tips that one can do as an individual.

With the continuous decline of environmental quality due to anthropogenic causes, the Environmental Management Bureau endeavors to educate the populace through varying initiatives aiming to conserve and preserve the environment. The IEC posters aim to increase awareness among students, teachers, and other stakeholders about the matters of environmental preservation. By educating, it may catalyze the enhancement of environmental quality for future generations.
